

Snowmobile Shelter Guidelines

The information below provides specific guidelines for snowmobile shelters. Snowmobile shelters, owned/operated by local snowmobile clubs, may open provided all guidelines are followed.

Public Health Orders

- Every person who visits a shelter must follow public health orders in order to prevent the transmission of COVID-19.
- People experiencing signs of illness should not enter the shelter.
- People who have travelled internationally and who have not completed the federally mandated self-isolation period may not enter.

Basic Public Health Measures

- Gathering size cannot exceed Public Health Order numbers, and is subject to physical distancing requirements.
- Members of extended households can sit/stand together, with a minimum of 2m between extended household groups.
- Sharing food or drink is prohibited.
- The SSA encourages snowmobilers to carry and use hand sanitizer, approved by Health Canada, and ensure frequent hand hygiene.
- Clubs must have access to proper cleaning and disinfecting supplies and provide enhanced cleaning and disinfecting of public areas, shared spaces and commonly touched items, particularly in high traffic shelters, on a regular basis.
- If a shelter is busy, come back when it is not as busy.
- Mask use is strongly encouraged.
- Signage must be posted on all shelters to caution about the risks of COVID-19, as well as educate users in following the guidelines. Signage should include the following:
 - Shelter may not be subject to scheduled disinfection.
 - Individuals who are sick should stay home.
 - A physical distance of two meters should be maintained between people not from the same household or extended household.
 - Individuals should use hand sanitizer frequently.
 - Avoid overcrowding. Individual groups must not exceed the restrictions on public gatherings.
